First time you met me you shook my hand
But you looked the other way
The values you cherish contradict every word you say
Look at me
We're all the same
There is no one to blame
If our skins have different shades
We're all of a kind
It's all in your mind
So please put down your blades
Stop making fun of everyone
That doesn't look like you
Or all those years of suffering
Will fall back down on you
Like a deck of cards
We're different kinds
But still we're all the same
We're in this together
And there's nothing you can say
Now it is time
To lose all the lies
That people give to you
It's time to react
Time to fight back
Together for the truth
You're living in your little world
And there is hatred in your eyes
But that hatred still remains unjustified
If different skinshade is anomalous
Which one is right
United we stand tall
Divided we will fall
You and I both know that we can live together
All it takes is time and we can get there
It's time to lose that fascist racist state of mind
I want to hear you say
United we stand tall, divided we will fall!
