Yeah, i can hear you even now  
Telling me - here's what makes this world go 'round  
And again, i can see that you believe  
Isn't that what it means to be nieve?

Think ahead, and watch your step  
Do your best, to make the most  
Of every chance, that you can get  
It's in your thoughts, it's on your mind  
It's in your head

Hey you! this is not your lucky day  
Would i lie? no! i'm behind you all the way  
What will you do, when this thing hits you like a bomb?  
You will laugh (ha!), and you'll know that i was wrong

[chorus]

I don't know - sometimes i just can't believe my eyes  
The things i see, things that really  
Mean the world to me - just falling down  
And i wonder, how long will it last?  
I don't know, all i know is we have got to do our best

Think ahead, and watch your step  
Do your best, to make the most  
Of every chance, that you can get  
It's in your thoughts, it's on your mind  
It's in your head  
Here it comes - give it everything you've got  
Yeah this is it, and like i said  
It's in your thoughts, it's on your mind  
It's in your head
