When I first met you
You didn't even see me
You looked straight through me
As you drifted through the crowd

But I was strucked by your light
I fell in love
I had to get a little closer to you
I wish that you would love me too

Will you say it to me, when the night is over
Will you tell me, that you want me to stay
Why can't this moment, last forever?
Tell me that you want me to stay

Next time around, I asked you to a party
The smile on your face made my heart beat boom
boom
My hands were shaking, you're all that I desire
I was so scared that I should say something wrong
By act to show my love for you

Will you say it to me, when the night is over
Will you tell me, that you want me to stay
Why can't this moment, last forever?
Tell me that you want me to stay
[x3]

Will you say it to me, when the night is over
