When your feelin' sad and lonely
Think of me
When you need a friend to lean on
Lean on me
When the world outside is darkest
And the sky is no longer blue
Just remember when the day is done
I will think of you.

He said I wish that I could be there
I wish that too
If only we could spend the time
The way we used to do
But the time that once belonged to us
Now belongs to others too
But remember though I'm far away
I will think of you.

Then late at night when I'm alone
The thoughts they always take me home
When I think of the way it used to be
And the places, God, it won't be long
Till I'm back where I belong
But until that moment, lovers think of me.

So when your feelin' sad and lonely
Think of me
When you need a friend to lean on
You can lean on me
When the world outside is darkest
And the sky is no longer blue
Just remember when the day is done
I will think of you...
