My Donegal Shore

Oh I know its not right reminiscing tonight
Of days that are gone and returning no more
For the girl I dream of has another mans love
Far Far away on a Donegal Shore

But why should I care for She is happier ore there
She may have children she may be wealthy or poor
But I can't help my dreams Of what might have been
If I stayed at home on my Donegal Shore

Now its winter time there all the trees will be bare
And The rain clouds will darken my native theadore
But if that girl I could hold Every rain drop would be
gold
It would fall all around us on my Donegal Shore
Now there's no one to blame But before she took his
name
She told me she loved me and it hurt to the core
But I could never descend to be only her friend
So I left her there on my Donegal shore

Now its winter time there all the trees will be bare
And The rain clouds will darken my native theadore
But if that girl I could hold Every rain drop would be
gold
It would fall all around us on my Donegal Shore
But if that girl I could hold Every rain drop would be
gold
It would fall all around us on my Donegal Shore
