[Ras Kass]

You want to talk to God? God never sleeps

[Chorus]

Ras Kass: Now what came first, the chicken or the egg?

God: Armageddon

Ras Kass: A arm a leg a leg a arm a head

Headin in your direction

The riddle was the answer to the question

Born of the flesh, what is perfection

[Ras Kass]

Inside my mother's womb, doomed to return to the tomb

Or was it from the dead I was raised?

All too soon to pay, on judgement day

Is this beginning or the ending

Died sinning, still winning, still grinning

This ending, verdict still pending, born pretending

Three-hundred billion men, women, and children

Deja vu, could be I'm dreaming

But we all ask for divine reason

While still breathing, and until leaving

Who?, What?, When? Where?, How?

But most of all why?

[God]

Why what?

[Ras Kass]

Do we live just to die?

[God]

The Book of Haden

Way before the after God pitting heads

No God for me, mathematically, in division

My decision was all inventions

I need not mention infinite dementions

But the human mind's flaw was limited comprehension

So while you try to travle to Mars and the stars

The God manifests through the entire universe

From the Sun, Moon, the Earth
I created man in my image and the black man was first
The scientific explanation, yea I made man out of dirt

[Ras Kass]

But how can a man be first, when its the woman that's
giving birth?

[God]

Listen, single-celled organisms
The homosapien, the albanian

[Ras Kass]

What's that?

[God]

White people

[Ras Kass]

They keep the world seperate and unequal

[God]

The teach you, right is wrong, wrong is right
Up is down
Teaches King Arthur's throne, is the planets that are
round

[Ras Kass]

Can we really time travel, and is there life in outer
space?

[God]

Wait, you knew all this in the first place
You tryin to get to God

[Ras Kass]

But, I've fallen from your grace
A billion paths to take, but which one is truly straight?

[Chorus]

[Ras Kass]

Can you walk across water or rise from the dead?
I heard he said he lived, and the son of man bled

[God]

It's a process, shit dont just happen, I create it
Everything you see, and shit you dont, son I made it,
and waited
I'm the big bang theory and evolution
Been there, done that, from revolution to prostitution

The first and final solution
The quaran, bible, and vedas, is only tools
dont be confused when the medula oblagada do

[Ras Kass]
Oh, so revelations is Genesis

[God]
Three-sixty degrees are limitless

[Satan]
Shit, my motherfuckin nemesis

[Ras Kass]
Who is you?

[Satan]
Son, I thought you knew
Who else? Lucifer, the lie bearer stupid, the devil
himself
He the creator, we all the creations, guess i'm eternal
damnation
Got you bitches seaking your own salvation
Who taught you how to pray?
You read it in the book, look, your bear witness to Amen
Ray
Every day when you say Amen, and then turn aroun
and preach worshipping false Gods, is an unforgiveable
sin
Yea the good book is like comic books, you take 'em
too literal
I tricked you in to believin' the power to reason
Makes you able to live infinitely, in the physical
Guess I'm the pawn com lyrical
Basically I tell true lies in general, the yin and the yang
The player with a trillion years of game

[God]
He got you sellin your spiritual, for power, monery, and
fame
I came out of tripple stage darkness, gave mortals my
attributes
But even you may be a mystery God like the lockhead
A used sign to prove or disprove my existence
Tryin to align this, artificial intelligence, cloned in a
space station
Tryin to build the tower of babylon
But you savages stake me, when I start erasin
homosapiens
You lookin for an angel with wings
I'm 'a bring young niggas with a ak, fuck a alien

[Ras Kass]

So what you sayin is, you the one that created sin

[God]

What you call mother nature, was the nature of me
What you call evil, ultimately, was the force inside of
me

Matter cant be created or destroyed it just changes
shape

One God, many people, and many faith

And this is how I wanted to do 'em

[Ras Kass]

Wait, wait, hold up

Father tell me, who is God's son?

[Chorus] - repeat 2X

[God]

I be the Jesus to your Buddah, the Chrishna at your
Junah

The big kahauna, Jehova Witnesses, suede pumas

Zuese, Pharoah, Elohim, Saturn, Yaweh Jiah

Arastifa Rah, Allah, the most powerful

But then, only Adam and I

I'm the oceans, the trees, a bumble bee, and a glock

Earthquakes, how much money you ever take

The reason behind every mistake mankind continually
makes

[Ras Kass]

Did God create man, or did man need to create God?

[Satan]

The answer is both, cause how mortals look at God is
odd

[God]

You try to customize me to be comfortable

For what you want to do, and how you choose to act

The Roman Christians will tell you God aint black

But to get something from nothing is physically
impossible, thats a fact

[Satan]

Black is the combination of all colors

[Ras Kass]

White is the lack thereof

[God]

Darkness is beneath the ground, and in the skies up
above

The clue, is that the true illumination is me, not
illuminati

Cause I alone discriminate

Any who be believing they can rationalize our out
reason me

Who created your creature, student can never be
greater than the teacher

Whether its Adam and Eve, or atomic chemistry

I'm the one true source of all energy

Who will eventually destroy every enemy when I see fit

I can't blaspheme my own name so when God damn it,
so be it

[Satan]

That's called the wrath of God, but we gotta deal, I can
chill

Fuck up the whole world, and in the end,

He'll still fulfill his plan, to return man to his original
position

Nigga gave me some hooks, and said I gets to go
fishin

[God]

I gave man dominion over the Earth, to master the
wealth

But most of my children don't have dominion over
themselves

[Satan]

That's where I come in

Call it original sin

Well, who really gives a flying fuck?

I taught you how to blood suck, and ultimately self
destruct

[God]

Know the ledge, wise the dome, do the data

I'm the alpha

[Satan]

I'm the beta

[Ras Kass]

And I'm omega

To be or not to be was man's question since conception

I think therefore I am, was man's perception

But the birth is the resurrection

The son of God, or God's son, that lights our entire

spectrum

You got everlasting life, long as you got day and night
Illumination, not education, to bring the blind sight
And what you need to know is that you'll never know it
all
I'm a lowercase g, son of the ever-living God
