"Be Happy"

I met you like in a dream,
My stupid words don't know what to say,
I am loseing myself in your eyes,
They are telling more than you.
We are near and near,
This love can't end.
Millions of promisses, millions of wishes,
I throw the world below your legs,
You are thrust me again,
I know that you are crying on your pillow,
I know that I can be happy beside you,
Happy, I'll be happy forewer beside you,
I'll be happy, I know that,
You'll be near to me,
Happy, happy and crazy for life,
Happy, we'll find history without the end
