Verse 1 (Hempzee#93)

Will you hoes with dough who enjoys spurting crystals
Owns four Rolls Royce for toys start using your brain
It's insane how this game works it's a sick of market
The sick market where chance of gettin fit is
microscopic

The real deal is a pill could kill the illness
Just if some millionaire had the will
You'd rather keep your green bill and see them get
killed
Instead of free them from their medical bill

Ain't that fair of ya? Malaria killin a million a week
Weakening the people
The problem gets deeper than that in lack of vaccine
seeking
Because of economics back pocket lockin the topic
At the rich man's ass who got the power to stop it

Is it reasonable concerning something this lethal?
The reason medicine is produced is for green flow
This predicament is thicker than all of the shit you
thinking and
Of course the laws need to crossed
In case that's what it takes to making it

Chorus

Roots of magic kind and roots related
Roots guide to where it all originated
Hip Hop is co-op and it has no stop
We're on the top and we aint gonna drop

Verse 2 (Gato#92)

But this is what you get when nation's border's drawn
with rulers
By the rulers from imperial-istic serial killias
For how the fuck is Africa about to unite
When euro-wired tangled distant fist is keeping the
might

Of latitudes where attitudes don't level European

Measures of accomplishments, Medevilterranean
And then taking it for granted that the God that
brought the Dark Age
To an end would now assemble strength to upon this
continent ascend

And stop the suffering, and all these wounds mend
Oh Christ what a guy, he did it again
I guess they weren't payin' attention in history class
Or was the cradle of mankind sacrificed for nation's
rise?

Typical American way to make a standpoint
Rearview mirror glance enhance: Liberia liberation
front
And for once send something else than tanks and
choppers
So hang onto this beat until the standard is proper

Chorus
Roots of magic kind and roots related
Roots guide to where it all originated
Hip Hop is co-op and it has no stop
We're on the top and we aint gonna drop

Verse 3 (GMG in swahili)

Chorus
Roots of magic kind and roots related
Roots guide to where it all originated
Hip Hop is co-op and it has no stop
We're on the top and we aint gonna drop

Interlude
It's time. time to rise up and stand firm for the belief
There is a struggle, but it must be lived through
The origin of the species, never forget the past
Always mind the present now keep your eyes on the
future
And make them no longer fake that smile.

Chorus x2
Roots of magic kind and roots related
Roots guide to where it all originated
Hip Hop is co-op and it has no stop
We're on the top and we aint gonna drop
