(oohs)

In the night when the moon is clear  
You my dear are very near and so warm  
Like a hot summer day late in june

Remember when we were so young  
We thought that everything was fun  
But really life had just begun

I never want to leave you  
I never want to go  
I just want to be beside you  
Everywhere you go  
I never want to leave you  
I never want to go  
I just want to be beside you  
Everywhere you go

Remember when we were so young  
We thought that everything was fun  
But really life had just begun

And I never want to leave you  
I never want to go  
I just want to be beside you  
Everywhere you go  
I never want to leave you  
I never want to go  
I just want to be beside you  
Everywhere you go

In the night when the moon is clear  
You my dear are very near and so warm  
Like a hot summer day late in june  
You're so warm  
Like a hot summer day late in june  
You're so warm  
Like a hot summer day late in june
