Open wound
Bleeding trench
Victim of explosion
Suffering i
n pain lying frozen
Aching, throbbing, burning
Swelling, straining, hemorrhaging
Crippling, piercing, stinging
Severe, intense-agonizing pain
You lie in your bed with your fractured skull
Pins and needles in your head. Your life is dull

Metal shavings planted deep inside your gut
Swollen gash, your flesh is raw, your throat is cut
Your body spasms
Your face is charred
Your lungs are punctured
For live you are scarred
Your skin is blistered
You're badly bruised
Your legs are twisted
T
he ones you once used.
