Doe prescribes me Tylenol Three
Because I fell and hurt my knee
I've been taken them a fucken week
Since then I've taken many leaks
Inside my stomach I feel a lump
I want to take a shit from my rump
I lie here and I'm constipated
Last tim
e I shit is now outdated
Here I sit broken hearted

I tried to shit but I only farted
I miss the fucken burning sensation
But all I feel is constipation
I need to take some fucken Ex-Lax
Or become incontinent so my bowels relax
My fucken shit is hard as wood
I'd try to shit if I knew I could
