Just to sleep, just to sleep
Put them lighters up, up
Put them lighters up, up

My body is cold, I need your help
I'm coming down from a perfect spell
Can I take a hint of your love's device
Inhale the rum, you're just in time
Your fingertips leave me hypnotized
And when it hits my lips I am paralysed!
Cause we come too far, and it feels so right
So put up a fight, just enjoy the ride!
No wrong or right, just want the light!

Chorus:
So put them lighters up, when you see me coming
Put them lighters up, I wanna see you wave them in the
sky
So put them lighters, put them lighters up

Up, up, put them lighters up
Up, up, put them lighters up
Up, up, put them lighters up, up, up

Strike a match while I catch my breath
Burn it down, I see the take
Open my eyes and let my spirit bright!
Cause we come too far, and it feels so right
So put up a fight, just enjoy the ride!
No wrong or right, just want the light!

Chorus:
So put them lighters up, when you see me coming
Put them lighters up, I wanna see you wave them in the
sky
So put them lighters, put them lighters up
Up, up, put them lighters up
Up, up, put them lighters up
Up, up, put them lighters up, up, up
