Living on the street  
Tonight's a lonely place to be all right, oh lord  
The rhythm of the city, I don't find it pretty anymore  
Like I did before  
You walked out my door

Give me back the beat, give me back the beat  
Give me back the only thing that makes my life  
complete  
If you come back to me, I'll be dancing in the street  
I miss the two we had before that made me tap my feet  
That used to rock this boy asleep now that you're gone  
(she's really gone)  
Give me back the beat and let's rock on

I feel the pounding of your heart  
But I'm alone here in the dark, it's true  
Alleys filled with misery  
Shadows of your memories break thru  
I never knew  
How much I needed you

Give me back the beat, give me back the beat  
Give me back the only thing that makes my life  
complete  
If you come back to me, I'll be dancing in the street  
I miss the two we had before that made me tap my feet  
That used to rock this boy asleep now that you're gone  
(she's really gone)  
Give me back the beat and let's rock on  
(ooh, rock on baby)

I won't sleep; baby, I can't eat  
I'm in too deep

It's a high fall running into a brick wall all by yourself  
But I know what will help

That used to rock this boy asleep now that you're gone  
(now that you're gone)  
So give me back the beat, you've got to...

(Give me back the beat, give me back the beat)  
Give me back the only thing that makes my life  
complete  
If you come back to me, I'll be dancing in the street  
I miss the two we had before that made me tap my feet  
That used to rock this boy asleep now that you're gone  
(she's really gone)  
So give me back the beat and let's rock on  
(ooh, rock on baby)  
So give me back the beat and let's rock on  
(rock on)  
Give me back the beat... and let's rock on

(ooh, rock on baby)  
Let's rock on, baby, mmm...  
(ooh, rock on baby)  
Gary's rockin'... Mark's rockin' on...  
(ooh, rock on baby)  
Steve's rockin' on... Ringo's rockin' on!  
(ooh, rock on baby)  
Come on, rock!  
(ooh, rock on baby)  
Let's rock on.
