Music man  
I'm here to have a good time  
There's nothing else on my mind, music man, oh yeah  
Music man  
I'm poetry in motion  
You're touching my emotion, music man

Play your song 'cause we came to party  
Friday night has come and I'm feeling naughty  
Make him look at me, his love is what I'm hoping for  
Music man  
Take control, take me to the limit  
Play the song of love and wrap me up in it  
Let me feel his arms  
I'm counting on you, music man, music man

Hey, music man  
This night is made for dancing  
I need some sweet romancing, music man

Music man  
I'm here to have a good time  
There's nothing else on my mind, music man, oh yeah  
Music man  
I'm poetry in motion  
You're touching my emotion, music man

Play your song 'cause I wanna feel it  
Play it all night long until I relieve it  
Burn the disco down with your funky sound  
Music man, music man  
You're the best exchanging my moods  
You move me up and down, you stay in the groove  
You make love with your song  
That's why I need you, music man, music man

Hey, music man  
This night is made for dancing  
I need some sweet romancing, music man

[Interlude]

Music man  
I'm here to have a good time  
There's nothing else on my mind, music man, oh yeah  
Music man  
I'm poetry in motion  
You're touching my emotion, music man

Play your song 'cause we came to party  
Friday night has come and I'm feeling naughty  
Make him look at me, his love is what I'm hoping for  
Music man  
Take control, take me to the limit  
Play the song of love and wrap me up in it  
Let me feel his arms  
I'm counting on you, music man, music man

Hey, music man  
This night is made for dancing  
I need some sweet romancing, music man

Play me the music  
Play me the records  
Play me the music  
What you waiting for

Play me the music  
Play me the records  
Play me the music  
What you waiting for

Play me the music  
Play me the records  
Play me the music  
What you waiting for

Play me the music  
Play me the records  
Play me the music  
What you waiting for
