Days of the conflicts you've been in  
Traces of conscience you don't want to hear  
You hear it now  
You listen, hear a sound  
You missed it  
Taken by conscience or taken by guilt  
You live in the problems you decided to build  
You hear it now  
You listen and hear a sound that can't be still  
The blame is found, you got it  
Rode when she was new  
You're used for glue  
Yeah  
Dazed for time you were into  
Praise from the crowd that you wanted to fool  
You call them now, they're waiting  
To hear a sound that can;t be still  
The blame is found, you got it  
Rode when she was new but wasn't told when she was  
through  
Yeah  
Listen now the sound that can't be still  
But wasn't told when she was through  
Yeah
