Friends for 15 years
Family forever
The day i leave
That is the day i wilt and die
Born and raised in the country
Obsolete from the city
The back roads hold my selfdoubt and worthlessness
Pity

[Chorus]
From the heart
From the soul
Small town pride is all i know

Standing in the cold
I see my own breath and wonder if tomorrow's gonna
melt the snow
Early in the morning i start up my car and drive around
to realize there's no place to go

[Repeat chorus]
