

Rivulets And Violets "By Your Side"

Visit "[By Your Side](#)" on MotoLyrics.com

I danced within my soul the day we met
I read your story through your eyes
Starlit nights / your arms in mine
I've seen you in my dreams

You knew the words I thought, before I spoke
You understood my heart, my mind
The world around / just disappeared
The love I still feel

If mountains fell all around
Is there shelter by your side
And if my heart should break
Would I know that you were there

We used to walk along hand in hand
We'd talk about the times to come
And talk about / our memories
Between us the stories

To wait for the time when
These memories will fade
To live in this sadness
Won't you fill this space I'll wait
