Mountain bike, Gatorade
Show the world how you're made
Catch a wave, grab a Dew
When the ads tell you to
SUV, BlackBerry
Got the props, nothing's free
Bluetooth on your head
Random girl in your bed

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving
You gotta keep running to see the whole world

Get a quote, make a trade
Now you're hot, well played
Corporate takeover
Late nights you confer
Workers losing jobs
Deal's a deal, not your prob
Auction block, make a bid
Never think what you did

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving
You gotta keep running to have the whole world

But... did... you... know...

You can see it, you can see
You can see it, you can see
If you slow down, if you slow down
You can see it, you can see the Universe

Did you know you can?

But instead...

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving

You gotta keep running to be the whole world

Buy a house big as life
On the mantle put your wife
Rig it out, show your friends
You're the king, means and ends
Buy it all, fill your cup
Got the stuff piling up
ATV, snowmobile
How's the Earth gonna heal?

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving

You don't have to do it you don't have to do it
You don't have to do it you don't have to do it

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving

You can see it, you can see

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving

You don't have to do it you don't have to do it
You don't have to do it you don't have to do it

You gotta keep running you gotta keep moving
You gotta keep running you gotta keep moving

You can see it you can see,
You can see it you can see
If you slow down, if you slow down
You can see it, you can see the Universe
