I should have never let you go, always another  
I need this more than you will know, but there's always  
another  
A million byways and highways and there's always  
another  
Someone else to pay your way and try to take your  
innocence  
There's always heartbreak

I hold steady while you're shaking me loose  
You keep breaking me down but I still ain't over you  
I've been living like there's nothing to lose  
And I'm telling you now that I still ain't over you

I keep your letters by my bed and there's always  
another  
I hear your voice inside my head and there's always  
another  
A waste of time wasted our days and there's always  
another  
Someone else to make you suffer

Make you think this whole thing over

I hold steady while you're shaking me loose  
You keep breaking me down but I still ain't over you  
I've been living like there's nothing to lose  
And I'm telling you now that I still ain't over you

I still ain't over you  
You're breaking me down and I still ain't over you  
And I got nothing to lose and I still ain't over you

I hold steady while you're shaking me loose  
You keep breaking me down but I still ain't over you  
I've been living like there's nothing to lose  
And I'm telling you now that I still ain't home, I ain't  
home  
I've been sleeping around but I still ain't over you  
I got nothing to lose, oh no, oh no I still ain't over you
