"How Deep In The Blues"

Visit "[How Deep In The Blues](#)" on MotoLyrics.com

It's none of my business giving advice
You can take it or leave, you don't need to be nice
You're living through hard times and it's starting to
show
How deep in the blues do you want to go?

It hasn't been easy living on your own
Got a house full of empty where there once was a
home
Tomcats on your doorstep and you never say no
How deep in the blues do you want to go?

Just how far will you go down
Till you lift your head and look around?
You have friends to surround you, baby
And maybe someone who loves you, hey, hey

Taking prescriptions, hide from your pain
Come the next month, baby, it's come back again, oh
yeah
Baby, so bad to see you down so low
How deep in the blues do you want to go?

Just how far will you fall
Till you see you just might lose it all?
You have so much to live for, baby
And I wanna show you how, hey, hey

None of my business how you choose to live
But sooner or later something's gonna give
You do what you want but I'd sure like to know
How deep in the blues do you want to go, want to go?
How deep in the blues do you want to go?
