I got this in my system  
Takin' over  
My imagination  
Getting wider  
This elastication  
Automatic  
No self-preservation  
Pull me into shape

My testimony never fails  
Like a metronome, on the nail  
First thing in the morning  
Late at night  
Stretch me to the maximum  
'Til I feel alright

Want you to  
Push stronger  
I need your elastic for tension  
Wait longer  
I need to release your potential

I want you to  
I want you to  
I want you to

Since you put your hand then  
In the pocket  
I've been rubberbandin'  
I can't stop it  
Stretch it to the distance  
Don't you get it?  
Makin' no resistance  
Please don't let me go

My testimony never fails  
Like a metronome on the nail  
First thing in the morning  
Late at night  
Stretch me to the maximum  
'Til I feel alright

Want you to  
Push stronger  
I need your elastic for tension  
Wait longer  
I need to release your potential

I want you to  
I want you to  
I want you to

It's your intervention  
So demanding  
Feel my surface tension  
I'm expanding  
Step into the same shape  
Where I started  
For your fascination  
Elasticate my soul

My testimony never fails  
Like a metronome on the nail  
First thing in the morning  
To late at night  
Stretch me to the maximum  
'Til I feel alright

Want you to  
Push stronger  
I need your elastic for tension  
Wait longer  
I need to release your potential  
Push stronger  
I need your elastic for tension  
Wait longer  
I need to release your potential

I want you to  
I want you to  
I want you to
