Love is made of words and scenery
And passion's just a deal
Cast a couple - could be you and me
They tell you what you feel

And the earth goes round
Still the answers can't be found
And the silver screen is running around

I am searchin' since so long ago
Time tells me no
I keep holdin' on
I've been waitin' for so many years
Indifference and cheers
How can I be wrong

Still I'm waiting every night and day
And keep my peace of mind
So sure I will find my way
Or am I just too blind

And the earth goes round
Still the answers can't be found
And the silver screen is running around
