

Robert Plant "Anniversary"

Anniversary of love's decay
What is this land, that I have found
Bitter silence all around It's the anniversary
Feel the fear, and sad defeat keeps my fragile haunted
peace

On the anniversary through these dark and lovely
streets
Drag my raggedy defeat
It's the anniversary, the anniversary
It's the anniversary, how far is hate

Away from this reluctant heated kiss
On the anniversary, the anniversary, the anniversary

Ooh I don't want to feel your kiss no more
I don't want to feel your kiss no more
I don't want to feel your kiss no more
Oh, oh, oh, oh, I don't want to feel your kiss no more
oh, oh, oh
