Down, down, down - always make the same mistakes,
again

Down, down, always down - always make the same
mistake

Talk is cheap, but you're talking fast

Never take the time to think of where it will end

Walk and talk and don't look back

I don't know which way it's gonna lead me baby

I try so hard but I can't understand - lead me baby

Just help me get my feet on the ground

Down, down, down - wanderin' through the places that
we both used to go

Round, round always round - chase me and sedate me
now but don't let me go

Restless sleep, locked in my lonely room

Empty arms are waiting for the morning to come

In the deep, where my dreams come true

Take care now - I'll keep you now, but lead me baby

I try so hard but I can't understand - lead me baby

Help me get my feet on the ground - help me baby

I can't stay down for too long now baby

I can't stay down for too long now my baby

If I'm crying, well it's 'cause I'm lonely

You know I'm only ever lonely without you

If I cry, well it's 'cause I'm lonely

'Cause I can be so lonely, I can be, I can be, I can be
