Electric It's a natural high We don't always know why  
It's electric Electric Electric Well it's electric Keep your  
ego aside It's a thing you can't deny Blood boils without  
fire Day come day go Without your desire Disturbs the  
flow Night falls When in denial Falls to take you higher  
It's electric It's a natural high Electric We don't always  
know why Electric Keep your ego aside It's the thing  
you can't deny Well it's electric A hard question Needs  
an easy answer The higher the bounce Recognize,  
accept no need to censor Smooth moves The harder  
the fall Keeps your buoyancy Yeah, keeps your balance  
Ohh ah It's electric It's a natural high Electric Electric  
We don't always know why Keep your ego aside It's the  
thing you can't deny Well it's electric Ohh Electric  
Electric (can't deny that it's so) Electric (it's electric) In  
the eyes of a child And the love that moves Electric  
(ooh yeah yeah yeah) The sun and the stars above  
That race your heart Somebody dies And you have to  
cry When you think this is it And then some other Shit  
just happens Yeah, it just happens, happens That's  
when It's electric It's a natural high Electric We don't  
always know why Keep your ego aside Electric Well it's  
electric It's the thing you can't deny It's electric It's a  
natural high We don't always know why Electric Electric  
Keep your ego aside Well it's electric It's the thing you  
can't deny
