Tell me what this means
These words speak to me
Cause everything's so complicated, so overrated

I'll give you all I have
For what it's worth
Just promise that you'll whisper softly and take it easy

Just swallow it down
And just say maybe it's just not good enough when
you're on the verge of enough when I'm on the verge of
hanging up

And I know, I know, I know there's something more
There's something there
I just can't seem to understand it
And it seems, it seems, it seems to me you're just too
scared
Don't take everything for granted

Just swallow it down
And just say maybe it's just not good enough when
you're on the verge of breaking down
Just swallow it down
And just say sometimes isn't good enough when I'm on
the verge of hanging up again
