It's late at night, it's just me on the street
It seems alright, yet not enough for it to be complete
I need you to be here with me
I need you, I want you to be

It's late at night, I won't face my fears
It seems alright, but you left your vales of tears
I need you to be here with me
I need you, I want you to be

It's late at night (Late at night)
It seems alright (It seems alright)
I won't show my fright (I won't show my fright)
Because darkness turned to light
If you were here, if I could see
Your stareyes, it'll make things clear
I don't want things to blur

It's late at night, the lights kill my shadows
It seems alright, it'll come back with the halos
I need you, to be here with me
I need you, I want you to be

It's late at night, an image crossed my mind
It seems alright, now I have a reason to find
I need you, to be here with me
I need you, I want you to be

My sunshine, to shred the darkness
But tonight, I want to be alone
Left out in the dark, my mind won't blow
If I could, I'll put myself right beside you

It's late at night (Late at night)
It seems alright (It seems alright)
I won't show my fright (I won't show my fright)
Because darkness turned to light
If you were here, if I could see
Your stareyes, it'll make things clear
I don't want things to blur
