"Somebody To Love"

Visit "[Somebody To Love](#)" on MotoLyrics.com

When it's cold outside
And you oh so far from home
Alone and in tears
With no place to call your own

Everybody needs something to believe in
Everybody wants somebody to love
You can't turn away from me (no more)

When it ain't no one to go to (go to)
And you think nobody cares (nobody asked yea)
And you may turn your backs
I'll just be right here baby

Everybody needs something to believe in
Everybody wants somebody to love
You can't turn away from me (no more)

Come on baby, listen when you're ready (come to me)
Come on baby, listen when you're ready (come to me)
Come on baby, listen when you're ready (come to me)
Listen when you're ready
Listen when you're ready

(Come on baby, listen when you're ready)
Everybody needs something to believe in
Everybody wants somebody to love
You can't turn away from me (no more)

No more, no more
No, nooo oooh

Everybody needs something to believe in
Everybody wants somebody to love
You can't turn away from me (no more)
