You've got eyes like astronomy

Kisses like the lottery

Girl you've got all of me

Like a love song

Your voice is like a stereo

Playing perry commo

You're best case scenario

So baby don't you let me go

They say I've gone insane

We'll I've got you to blame

So while they're acting cool

I'll be here living like a fool

Some people call me crazy I call it you

You've got me fallen for the things that you do

And when we touch I swear I can fly it's like

Whoa oh oh oh Let's keep our heads in the sky For Life

(is crrraazy)

If love's a pencil hope it's true

it draws me very close to you

Like every color flows to you

I swear rainbows propose to you

Call me crazy your so fine  
You really really blow my mind  
When hands become the valentine  
With mine in yours and yours in mine  
My brain has sailed away  
But you are here to stay  
I know this makes no sense  
but this really makes perfect sense  
Hey now your smile  
Hey now your smile  
It makes everything  
yea all of this worth while
