Remember when love took us by surprise
We saw happy ever after right before our eyes
Face to face we danced beneath the stars
We vowed we'd spend forever in each other's arms

Then for reasons we just can't explain
Love's rainbow faded to rain
We can get through this together, with His love to lead
the way
If we just hold on and have some faith

Chorus
We can find our way out of the rain
Hand in hand I know we can get past this pain
The Love that He gave won't be lost in vain
Trust that He'll find us a way, out of the rain

The clouds are dark and blocking out the sun
He's our place of shelter where we can run
With His help we'll work this whole thing out
God's love is always brighter than the shadows of
doubt
He'll give us all that it takes
He wants this love to be saved
We can get through this together if we trust Him and
obey
If we just hold on and have a little faith

(Repeat Chorus)

Let Heaven speak and shine the light into our lives
To show us the way
Let's open up our hearts and give all our fears to Him
And the sun will shine again

(Repeat Chorus)

Trust that He'll find us a way,
Trust that He'll find us a way, out of the rain
