You've got to move it on, baby
Come on and make it alright
You've got to move it on, baby
Let's have a party tonight

Every time I see your smile
I'm sure you can do it
They all wanna see you dancing
So come on and show it

What do I need to prove
To make you my lover
It's something you'll have to tell me
So I can discover

You've got to move it on, baby
Come on and make it alright
You've got to move it on, baby
Let's have a party tonight

Every night I see you dancing
I want you to stay
I only wanna get your love
But not for one day

I get a very special feeling
When you talk to me
Baby don't you understand
What that means to me

You've got to move it on, baby
Come on and make it alright, yeah
You've got to move it on, baby
Let's have a party tonight

Baby you're the only one
That I'm living for
Won't you try to be my love
Don't wanna it all

I would try to be the man

Who loves you forever
Nothing can stop us now
From staying together

You've got to move it on, baby
Come on and make it alright
You've got to move it on, baby
Let's have a party tonight

You've got to move it on, baby, yeah
Come on and make it alright
You've got to move it on, baby
Let's have a party tonight

You've got to move it on, baby
Come on and make it alright
You've got to move it on, baby
Let's have a party tonight

You've got to move it on baby, yeah
Come on and make it alright
You've got to move it on, baby
Let's have a party tonight
