I saw you coming, now you're running
Far away from here
Another day, passed away
& I can't wait to see that smile again

You're starving for attention
Did I mention that the world screams out your name
You said, I don't care what's out there
Or if the sky falls down on me

I'll take you to the moon

We'll fake it, we'll shake it, we'll move it all around
& the fields will dance like a fire's flames
When they see us getting down

Girl, take my hand, let's make a scene
Are you down for raising the dead tonight
Nothing's wrong, nothing's right
What do you say
We'll be dancing on your grave
