"Past Through"

Visit "[Past Through](#)" on MotoLyrics.com

There are times in the summer, lying next to you
When I swore I knew what we were born to do
That was youth and part of its beauty

I'm a lucky soul to have these memories
I will always hold them as a part of me
Live your life, I hope you find meaning

Love is always true
Past through but I'm always a part of you
Past through and you broke my heart
Past through but on the way you taught me
To remember who we are when we're apart

And the future is there, it's right in front of me
But How does one prepare for that which he can't see?
Close your eyes, you'll find it within yourself

And I know you're scared, you lack security
And you're unprepared to let go completely
But in time, you'll see that I'm with you

Love is always true
Past through but I'm always a part of you
Past through and you broke my heart
Past through but on the way you taught me
To remember who we are when we're apart

I'll love you til the end
I'll love you til the sun burns out
And you learn how a friend is more than time you spent
It's more than time could never mend
Time will never mend this

Past through but I'm always a part of you
Past through and you broke my heart
Past through but on the way you taught me
To remember who we are when we're apart
