how did you know  
where ever i was  
i wasn't thinking about you  
well i can't explain  
why i have changed  
it's not the smoke  
that, or your perfume  
can you quit what you started in the past  
cause you now it isn't real  
well nothing is real  
did you ever really think we had a shot  
cause i kndw we could never be forever

you made me feel  
in total control  
of the way that i felt about you  
but how could i know that i would be wrong  
i thought that we'd last til the end
