It's a wish it was a minor set back
The situation grew so stale
A compromise wasn't established yet
You got the sharp end of the nail

So let's keep in mind the substance that you built
Another lover's qualm that never got it's fill of anything

She said allusion's so sweet with your candy I smile
You're looking so sweet with your candy I smile
You're looking so sweet

Red suspicions have been running round for days
(running around for days)
You got the best of everything
You never wanted
When you'd take what you can get
And hope for the best of this
We have to give this one more try

Woah

Unexpected and so deceiving
You always seemed to make me smile
I can't believe I never figured you out
Or knew so it took me a while

But I kept in mind the substance that you built
Another lover's qualm that I can do without

She said allusion's so sweet with your candy I smile
You're looking so sweet with your candy I smile
Allusion's so sweet with your candy I smile
Allusion's so sweet

Red suspicions have been running round for days
(running around for days)
You got the best of everything
You never wanted
When you'd take what you can get
And hope for the best of this

We have to give this one more try

Woah

She's had this feeling for a long time now
She's had this feeling that she wanted more
She's had this feeling for a long time now
She's had this feeling and she hated it oh so

How long will I wait here (how long will I wait here)
With you in mind
How long will I wait here (how long will I wait here)
With you in mind (in mind)

Red suspicions have been running round for days
You got the best of everything
When you'd take what you can get
And hope for the best of this
We have to give this one more try

So let it go
[x7]

So let me
