There's a light that shines on me
Ever since you came to me
It won't go, it won't go away
Now i know that you're gonna stay
Now that i know
Your love means so much more to me now

Come here now baby
Now look what you've done to me now
I don't pray for what could have been
I feel i'm flyin naturally

I can fly but i won't go away
In your sky that's where i wanna stay

Come here now baby
Now look what you've done to me now
If i don't show would you know
Where to look for me now

I do not stare absently
Counting waves up on the sea
Now i know where i wanna stay
There ain't no hard decisions to make

Come here now baby
Now look what you've done to me now
If i don't show would you know
Who to send for me now

There's a light (x3)
