Some folks like the summertime when they can walk  
about  
Strollin' through the meadow green it's fun there's no  
doubt  
But just give me the wintertime when the snow is on the  
ground  
For he found me when the snow was on the ground  
He traced the little footprints in the snow  
He found my little footprints in the snow Lord  
I bless that happy day when I did lose my way  
He found me when the snow was on the ground  
[ mandolin ]  
He dropped in to see me there was a big round moon  
Mother said just stepped out be returning soon  
He found my little footprints he traced them through  
the snow  
He found me when the snow was on the ground  
He traced the little footprints...  
[ steel ]  
Now he's up in heaven he's with an angel band  
I know I'm gonna meet her in that happy land  
Everytime the snow falls it brings back memories  
For he found me when the snow was on the ground  
He traced the little footprints...
