You took her off my hands when you've stepped in  
You changed everything we're not even friends  
Don't leave the job half done leave nothing behind  
You took her off my hands now please take her off my  
mind.

Please take her photograph in great my heart's so blue  
And take all her memories she now belongs to you  
Don't leave the job half done leave nothing behind  
You took her off my hands now please take her off my  
mind.

--- Instrumental ---

Please take her photograph in great my heart's so blue  
And take all her memories she now belongs to you  
Don't leave the job half done leave nothing behind  
You took her off my hands now please take her off my  
mind...
