I have been somebody on nobody's mind  
A funny kind of winner losing all the time  
On my way to somewhere with no place to go  
Then you said hello

And now I walk with you, I talk with you  
At last you're here  
In my arms, close to me, so very near

Touching me, reaching me  
With everything you do  
Long nights through

God love you, God love you  
God love you, God love you  
You loving way will make me stay  
God love you

You've become the only one  
Who's always there  
In my dreams, on my mind  
In every prayer

By your side I'm satisfied  
No way to hide  
This feeling I have for you  
I'll swear it's true

God love you, God love you  
God love you, God love you

God loves you for being you  
And I thank you for loving me too  
God love you
