"It's Lonely"

Visit "[It's Lonely](#)" on MotoLyrics.com

Every sleepy dawn waked to find you gone and it's
lonely
All my sunny days, laugh and run away, it's lonely

The sun don't really shine, it's lonely
Always to remind me
That it's lonely another day
To feel this way, it's lonely, lonely

I am lonely all the time, you're not mine
With out you I find lonely each new starry sky
Smiles and says goodbye, it's lonely
Dreams we used to share, tell me you don't care, it's
lonely

The moon has lost its glow, it's lonely
It is there to show me
That it's lonely another night
I can hold you tight, it's lonely, lonely

I know why I cry for all the world to see
You're not here with me, it's lonely, lonely, lonely
