Our Love, our love, won't die, can't die
This kind of love was meant for you and I
This kind of love was meant for you and I

Your love, my love young love, true love
This kind of love was meant for you and I
This kind of love was meant for you and I

One dream through life, one day my wife
This kind of love was meant for you and I
This kind of love was meant for you and I

One dream through life, one day my wife
This kind of love was meant for you and I
This kind of love was meant for you and I
This kind of love was meant for you and I
