

Dark New Day "Tremendous"

Visit "[Tremendous](#)" on MotoLyrics.com

Call it a miracle, we rose up again
Every day bring a brand new horizon
We will wait if we stand up together
Till the end we will put through the weather

So here we are is tremendous
I will never thought we will live this day
Another day so tremendous
I am thankful that we can find our way

Keep it simple no more falling from grace
Straight our head we can come out of nowhere
Find our way out, out of the jungles.
On this day we can take off the world we can

So here we are is tremendous
I will never thought we will live this day
Another day so tremendous
I am thankful that we can find our way

So here we are is tremendous
I will never thought we will live this day
Another day so tremendous
I am thankful that we can find our way

So here we are is tremendous
I will never thought we will live this day
Another day so tremendous
I am thankful that we can find our way
