

## **Darkseed "Incinerate"**

Visit "[Incinerate](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Follow the fire  
Follow the sword  
Leave only death  
And praise the false lord  
Hunting the spirits  
Chasing the fools  
Raging for purity  
Anyone to seduce

Chop all the mortals  
(Steel finds flesh)  
Shatter their bones  
(Eye to eye)  
Rape all their highness  
(No reaction)  
Flatten their homes  
(A lifetime gone by)

Tell me will my hate someday perish?  
Will the wrath still hunger for this one bliss?

Incinerate - incinerate - incinerate  
Right now insanity is rising  
Misleading lines - forgotten lives - colorless nights  
Infinity is calling me  
Incinerate - incinerate - incinerate  
My agony will never end  
Misleading lines - forgotten lives - colorless nights  
Only darkness I can see

Flourish the cancer  
Deep in their lungs  
Unveil the toxic  
Genetic expanse  
I am the radiance  
No one can see  
Turn water sour  
For always to be

Infiltrate mortals  
(No reaction)  
Mutate their bones

(Eye to eye)  
Swim in their bloodstream  
(Light in the tunnel)  
Breaking the nodes  
(A lifetime to die)

Tell me will my hate someday perish?  
Will the wrath still hunger for this one bliss?

Incinerate - incinerate - incinerate  
Right now insanity is rising  
Misleading lines - forgotten lives - colorless nights  
Infinity is calling me  
Incinerate - incinerate - incinerate  
My agony will never end  
Misleading lines - forgotten lives - colorless nights  
Only darkness I can see

One day my hate will perish  
And I'll defeat the seeds of sorrow  
No more hungering for this one bliss  
Taking off into a bright tomorrow

Incinerate - incinerate - incinerate  
Right now insanity is rising  
Misleading lines - forgotten lives - colorless nights  
Infinity is calling me  
Incinerate - incinerate - incinerate  
My agony will never end  
Misleading lines - forgotten lives - colorless nights  
Only darkness I can see
