Hey little piece of meat
I think that maybe baby you are kinda cute
Come on and give in now
Kiss me with your eyes now baby

I think this world needs us
I think together we could make a better place
Come on let's shake it now
And I promise it'll be a miracle

Chorus:
Let's make sunshine in the rain
Sunshine in the rain
Sunshine in the rain
Let's make sunshine in the rain
Sunshine in the rain
Sunshine in the rain

Don't think about yourself
Don't be that selfish, think about humanity
We just need more like you
So come on now let's shake it baby

This is the way things work
You have some really super sexy DNA
Can't let it go to waste
You know that'd be bad Biology

Chorus (x2)

Our chemistry is right, baby don't try to fight it
It's in your eyes, baby don't try to hide it
I'm melting down babe, let me let it flow
Sunshine in the rain, sunshine in the rain now
