My true love did breathe by the sally ann so softly  
That while walking through town  
Only my heart did hear him  
In views of the city  
There ain't many folks by the sally an so pretty  
That while walking through town  
Many a twisted feature made a terrible beauty  
And then i knew  
I'd been there before  
One thing you must know by the sally ann directly

Is that the pockets don't hold any more sunken  
treasure  
After baptism by whiskey  
But when leaving the bar by the sally ann just barely  
That old angel may allow light from above the  
mountain  
And red brick walls blooming, you might see  
And then you'll know  
You've been there before
