[Dose One]

Sincerely, as always

(Hi new friend! Nice to meetcha!

Oh sure! I'll check out the dinner arrangements..)

We do it for a reason

Understand it all, take your time

I got a friend, a true leader amongst men

If I ever met one, hows about a hardy listenin

or even some, passive/attentive inspire

You to write later feedback, it's no

walk in the park to write about things you think and see

Or or is it that, a two-way coil

when once in a while there's bogs like, you to bump into

on a walk in the park

It ain't easy.. (so, give it up and I'm let down

it's an uninvited sitdown)

But it well.. (somethin feels, how do people place

in things that make one turn twelve)

And often study.. (self-expression,

and it goes a little somethin like this)

The evolution of an organism is it self-fulfilling

for a mind to settle DDN adjusters on bi slabs

And do the destructive creative changes

one before we even have the (?) to put a finger on

It's where exactly space is folding for us

so hand, gradually opportunity comes to this

You searched erotic costs a lot of sand

time, seconds yes, a body out of water yes

A lot of, divining moments, yes

I knows you all, why do you ask?

We not in, the big, poetry class

In fact.. we found broken round together..

So there..
