My primal blaze, my painful fate  
I lost my love, I feel your blame  
The endless fear takes me tonight  
There is no life, there is no light  
The creeping pain controls your brains  
The end of life for you is near  
I will be dead, I'm not afraid  
The blameless world we will create

My soul's enchantment at the doors  
I'm looking for the naked forms  
The painless flowers slowly die  
And disappear in bleeding sky  
My soul's enchantment at the doors  
I'm looking for the naked forms  
The darkest people bless your face  
And I ignite the human race

And I will find the trees of mind  
I'll be a king and rule my land  
And don't betray my real name  
I want to fly, still in the sky

My primal blaze, my painful fate  
I lost my love, I feel your blame  
The endless fear takes me tonight  
There is no life, there is no light  
The creeping pain controls your brains  
The end of life for you is near  
I will be dead, I'm not afraid  
The blameless world we will create

My soul's enchantment at the doors  
I'm looking for the naked forms  
The painless flowers slowly die  
And disappear in bleeding sky  
My soul's enchantment at the doors  
I'm looking for the naked forms  
The darkest people bless your face  
And I ignite the human race
