"Window To The World"

Visit "[Window To The World](#)" on MotoLyrics.com

I've gone flying, trying to meet you
You've been hiding, riding me to a state
Like this

Give me that window to,
Give me that window to,
Give me that window to the world

We are sailing, flailing through the ether
You've been trailing, failing me with you're
View of bliss

Give me that window to,
Give me that window to,
Give me that window to the world

A little more than this,
A little less than that
You've got magic in your hands

You've conspired, inspired me to
Find a place like this

Give me that window to'
Give me that window to'
Give me that window to the world
