Rollercoaster ride, faster than a plane, we're going
Right above the sky we take off and fly, we're falling
Down with the rain and then up again, we're rolling
New energy generation

Will find its own way up
Will find its own way up
Will find its own way up
Will find its own way up

We are coming up to wake up the world, we're running
Right above the dreams, crazy but it seems, we're falling
Down to street where we all will meet, to go up
New energy generation

Will find its own way up
Will find its own way up
Will find its own way up
Will find its own way up

Will find its own way up
Will find its own way up
Will find its own way up
Will find its own way up
