

Rust **"Definite"**

Visit "[Definite](#)" on MotoLyrics.com

Bury me softly alive
Here I'm standing, my arms are open wide
No more paths left to try
They scream for freedom
Am I the only one outside?

Pray - your song is definite
I wouldn't let you go astray
Come here for a minute
I know your song, it's definite

I'm on the way to pay the price
But now I just don't realize
That what is left is a few more lies
(Haven't you tried me)
And every day as we disguise
You see the pain deep in my eyes
Don't lose the game, just throw the dice
They know my song is definite

No more tears left to cry
Been there and done that
But it didn't make me smile
You push the needle in my eye
I stretch but don't broke
I'm inside for a while

Pray - your song is definite
You fucked it up but still I say
Come here for a minute
I know your song, it's definite

I'm on the way to pay the price...
